

MainLite® Compact Inspection Systems

Introducing the ergonomic evolution of compact inspection system design. Years of market research and engineering has resulted in a sleek, easy-to-use system that won't strain your back, or your pocketbook. Available in many different configurations, the MainLite® systems can be used in portable applications, or mounted in vehicle, providing power and flexibility in one compact, affordable package.

The market spoke, and IBAK listened. Introducing the most sophisticated, compact, rugged and easy-to-use mainline inspection system we have ever designed. The MainLite® systems are adaptable, capable, and ready to go at the push of a button. We are offering these systems in affordable packages that can meet your needs whether you are a small town, large municipality or successful inspection contractor.

**Adaptable.
Elegant.
Affordable.**

*Optional mounted boom shown.

*Optional portable cart shown without required boom.

*Optional granulated wheels shown.

Compact and Portable

The MainLite® system is based around two very compact cable drums (KW 206 and KW 306) and the revolutionary BP Series of multi-function, computer controllers. The entire unit can be mounted in a truck, or used in portable applications with the addition of our new MainLite® Portable Cart, which provides seating and an ergonomic mount for the BP 100 controller.

BP 100 Controller

The multi-function computer controller has everything you need to conduct inspections and record video right out of the box!

BP Truck Mount Bracket

This economical bracket connects the reel and controller and mounts the BP controller conveniently on a flat surface. Required for installations where the controller will be operated away from the drum.
