

TRANSFER STATIONS

High Volume *Transfer Systems*

BlokPak 3000®

M-Series 1475XW compactor

Features

- ▼ Process up to 90 tons of material per hour
- ▼ Compact materials directly into transfer trailer
- ▼ Multiple options available to suit your application

The Worldwide Compaction Leader

Marathon® Equipment is known throughout the world as one of the leading manufacturers of quality on-site waste compaction products. The RamJet® brand has been the industry standard for quality and innovation for more than 50 years, and includes stationary, self-contained, apartment, and high-rise compactors, compaction containers, pre-crushers, auger-style compactors, transfer systems, and a wide array of options for virtually any application.

TRANSFER STATIONS

BlokPak 3000® Transfer Systems

Perfect for:

-  Transfer Stations
-  Municipalities
-  Convenience Centers
-  Recycling Centers
-  Long-Distance Highway & Rail Systems

BlokPak 3000® Features

The **BlokPak 3000** is the largest Marathon® transfer system compactor. It compacts waste against a vertical gate, forming a 10' (3 meter) log in the compaction chamber. Each log is then ejected into the transfer trailer, and the process is continued until maximum payload is achieved. When the trailer is full, the **BlokPak 3000** can continue to be fed while changing trailers, saving valuable time. This unique design eliminates the need for expensive ejection type trailers.

High Capacity Transfer Stations

Marathon offers transfer system compactors that process up to 90 tons per hour.

Specifications		
Structure Size (L x W x H)	53' 7" x 11' 7" x 17' 4 1/2"	17094mm x 3531mm x 5296mm
Charge Box (L x W x H)	99 1/2" x 75" x 95"	2527mm x 1905mm x 2413mm
Compaction Chamber (L x W x H)	107" x 78" x 79"	2718mm x 1981mm x 2007mm
Ram Cylinder	10"	254mm
Ram Force	235,500 lbs.	1048 kN
Ram Pressure	41.9 psi	289 kPa
Output Rate	Up to 90 tph (continuous)	Up to 81.6 mtph
Output Log Size	78" W x 79" H x Variable	1981mm x 2007 x Variable
Ram Penetration	60" into trailer	1524mm into trailer
Max. System Pressure	3,000 psi	207 bar
Main Cylinder Stroke	288"	7315mm
Main Pump Flow	200 gpm (regen)	757 liters/min.
Reservoir Capacity	400 gallons	1514 liters
Oil Cooler	Air to Oil	
Main Control Panel	120 VAC	
Main Motor	100 HP	74.6kW
Main Voltage	460 VAC, 3-Phase	
Controller	Programmable Color Touch-Screen	

The BlokPak 3000 forms 10' (3m) logs of densely packed waste.

The BlokPak 3000 has a 5' (1,5m) ram penetration. This ejects the final log into the trailer with very little spillage.

The BlokPak 3000 has a compaction chamber that densely compacts the waste before it's ejected into the transfer trailer. This enables much lighter-duty, open-top trailers to be used.

Pictures and mechanical diagrams in this literature are illustrative only and may not be to scale. Specifications are subject to change without notice in order to accommodate improvements to the equipment. Certified in compliance with ANSI standard Z245.2, all applicable OSHA Regulations. Products must be used only by trained operators in accordance with the Operator Manual, as well as applicable regulations, laws, and ANSI standards.

TRANSFER STATIONS

M-Series Compactors

Overview

M-Series Features

Marathon® M-Series Compactors are built tough for the high demands of transfer stations or heavy industrial applications. These compactors can be mounted on a platform to compact directly into the transfer trailer. Compactors come standard with extended snouts to aid in clean breakaways.

Physical Characteristics	M-450X	M-600X	M-800XW	M-1050XW	M-1475XW RAWHIDE

Rawhide Series®

Overview

Rawhide Series® Features

The Rawhide Series is a standard option on the M-Series 1475XW compactor. It has a 48" ram penetration that is especially beneficial for packing out transfer trailers for a clean breakaway.

Pictures and mechanical diagrams in this literature are illustrative only and may not be to scale. Specifications are subject to change without notice in order to accommodate improvements to the equipment. Certified in compliance with ANSI standard Z245.2 and all applicable OSHA Regulations. Products must be used only by trained operators in accordance with the Operator Manual, as well as applicable regulations, laws, and ANSI standards.

TRANSFER STATIONS

This transfer station, located in Salem, VA, features two BlokPak 3000 compactors for non-stop processing as well as added redundancy. They are fed from a tipping-floor.

The BlokPak 3000 fits nicely into existing transfer stations with over-the-top feed systems such as this one located in Black Foot, ID.

The BlokPak 3000 control station features a color touch-screen interface. This installation also has an integrated weighing system that displays the accumulating weight on-screen and on overhead monitors while the waste is being processed.

Transfer station compactors can be configured with custom hoppers and feed systems.

This M-1475XW Transfer Station Compactor is fed via a tipping-floor and features the Scissor trailer connection system.

Optional Equipment

Marathon® Transfer System Compactors can be fitted with a variety of options, such as trailer connection systems, to suit your application. The hydraulic scissor extends to connect to the trailer's vertical pin latch. The hydraulic grab claws hold the trailer, using their side pockets. **Marathon** also offers EZ-TRAX Conveyors for an efficient way to feed your transfer system. Load cells can be utilized to keep track of the weight as the compaction trailer is being loaded to maximize payloads.

Extending Hydraulic Scissor Connector

Hydraulic Grab Claws

EZ-TRAX Conveyor System

**Load Cell Weighing System
Only available for BlokPak3000*
