

Automizer Alley-Hand™

Automizer Alley-Hand™

PREMIER SIDE LOADER WITH A STRONGER ZERO KICK-OUT ARM.

Experience a vertical lift automated arm with zero kick-out for minimized spillage, tailored for navigating tight spaces.

The standard 12-foot arm, supported by a 22-inch extension track, offers exceptional reach. Our innovative design eliminates chain wear over time, featuring a robust rack and pinion lifting system powered by two hydraulic motors. This ensures swift movements from curb to hopper and back in under eight seconds.

Unlike competitors, our gripper travels in the down position, eliminating damaging rocking during transit. The track's nylon material combines strength with durability. Operators have precise control thanks to proportional valves, allowing for smooth motions.

The Automizer Alley-Hand™ ASL: Advancing Waste Collection!

Laying the foundations for a truly exceptional product.

LABRIE™ INNOVATIONS

With a strong emphasis on innovation, Labrie's engineering team has crafted a comprehensive range of customizable options to cater to even the most stringent customer requirements. We are poised and eager to embrace emerging industry trends and fulfill evolving customer demands. This perpetual cycle of innovation positions Labrie™ as the forefront leader in side loader solutions across North America.

WEIGHT DISTRIBUTION

Over years of innovation, Labrie™ trucks prioritize ideal weight distribution in all models. Our ongoing objective is to achieve the perfect material balance, ensuring models collect more waste while maintaining the highest legal payload.

ENVIROLINK™ HAS LAID THE FOUNDATIONS FOR A BRAND-NEW ERA IN TRUCK INTELLIGENCE.

An improved multiplex network and analog system, cameras and monitors, scales, diagnostic tools, safety interlocks, alerts, GPS tracking, and more are now packaged in a more precise, reliable, and efficient Smart Collection Package.

Alley Hand™

- True Vertical Lift
- Zero Kick-Out
- 12 foot reach

TIGHT AREAS

The Alley-Hand™ arm excels in confined spaces like alleys, while still maintaining the versatility of extended reach.

AVAILABLE ABRASION RESISTANT STEEL

AR Steel offers strength, durability, and lightweight construction, making it ideal for robust hoppers without compromising payload capacity.

TIP-TO-DUMP OR FULL-EJECT

The Full-Eject system with T-Track Guide extends the lifespan of packer and wear components. A single cylinder handles both packing and full ejection.

IN-LINE ARM DESIGN

Our smooth-operating arms are crucial for maneuvering in tight spaces. They incorporate low "mass-in-motion" and "under hopper" inline designs, reducing torque during dumping for enhanced durability.

LARGE SUMP BOX

Our new sump box is 700% larger than the previous version, boosting liquid holding capacity and safeguarding the packer cylinders from waste leachate. Hydraulic hoses and tubing can be situated on either side of the body for convenient access and protection.

SINGLE SHEET OF STEEL ON THE BODY SIDES

Body walls are crafted from a single piece of abrasion-resistant steel, providing enhanced strength and a seamless surface ideal for graphics. This results in greater structural integrity, eliminating the need for reinforcement posts and reducing weld seams cracking and corrosion.
